Summary

Full-Stack Developer with over 15 years of experience in coding, web design, and application development, delivering user-focused solutions with robust functionality. Proficient in NodeJS, PHP, PostgreSQL, React, Vue, Angular, and WordPress, with expertise in TypeScript, Ionic, and UX/UI design (Illustrator, Figma, Photoshop). Experienced in leading projects for international companies in Japan, the USA, and Singapore. Previously lectured at FPT, Vietnam, mentoring the next generation of developers. Author of multiple IT software products in Vietnam, I have also built websites for banks in the US (through outsourcing) and currently work as a Full-Stack Developer at MADE Lab in Texas.

Professional Experience

Full-Stack Developer

MADE Lab

2022 - Present

- In my role as Lead Developer at madelab.io, I spearheaded the creation of MADE Platform based on Next.JS, React, PostgreSQL, T-Shirt design tool base on NodeJS, events site, also WordPress Themes and Plugins, optimizing user experience and functionality. I designed and implemented a ticket-selling system for events, resulting in increased revenue and streamlined event management. Additionally, I enhanced the check-in system to track event attendance and engage attendees through a point system.

LIFT Creations

2021 - 2022

- Developed the customized website at LIFT Creations using TypeScript, React, and PHP. Collaborated with cross-functional teams to optimize website performance and user experience. Created a cutting-edge SEM/SEO software, enhancing online visibility.

TRE Magazine

2019 – 2021

- I worked for the largest Vietnamese newspaper in the US - TRÈ Magazine. Here I built the entire website and server system, SEO and Social media for the business.

Various Companies (Japan, Korea, Singapore)

2010 – 2019

- Developed and maintained Single Page Applications (SPAs), mobile apps, and websites for global clients, utilizing WordPress, Angular, React, Vue, Ionic, and NodeJS to deliver high-performance solutions.
- Designed and implemented responsive, user-friendly interfaces with HTML, SASS, PUG, and UX/UI principles, enhancing user experience and engagement.
- Engineered backend systems with PHP, NodeJS, and PostgreSQL, ensuring scalability and robust functionality for enterprise-level applications.
- I work at CanhCam.VN, one of the leading web development companies in Vietnam, specializing in building websites for large corporations such as Toshiba, Sony, real estate companies, and major banks...

Lecturer

FPT University, Vietnam

2017 – 2019

- Instructed courses on web development, mobile app development, and software engineering, covering technologies like React, Angular, WordPress, NodeJS, and modern JavaScript frameworks.
- Mentored students in building real-world projects, fostering practical skills in design, coding, and deployment.
- Developed curriculum content to align with industry trends, ensuring students are equipped for careers in technology.

Key Projects

- **SEO Tool (WordPress Plugin)**
Developed a WordPress plugin to optimize websites for search engines, improving site visibility and user traffic. Deployed on <https://seo.nguyenpham.pro>

- **All-In-One Website Builder (CAB)**
Contributed to the development of a drag-and-drop website builder tool for Cánh Cam, enabling users to create customizable sites with JavaScript and component-based architecture. Source: GitHub.
- **madelab.io**
madelab.io is a website system for MADE Laboratory, offering clothing design software, online ticketing, and more
(<https://nguyenpham.pro/work/made-framework>)
- **LIFT Marketing**
Building custom plugins and themes for LIFT Creations to develop websites for clients, enhance performance, and integrate robust SEO... (<https://liftcreations.com/>)
- **eVisa**
eVisa management system is a system that helps businesses streamline the visa application process for their employees and customers. The system is easy to use and offers a variety of features. (<https://nguyenpham.pro/work/evisa>)
- **Health Supply System**
Health Supply Management System is a web-based application that helps health facilities manage their supplies. The system allows users to track the inventory of medical supplies, manage orders, and generate reports. The system is designed to be user-friendly and easy to use, with a clean and intuitive interface
(<https://nguyenpham.pro/work/health-supply-manage>)
- **T-shirt Builder**
The T-shirt Builder is a web application that allows users to design their own t-shirts. Users can choose from a variety of colors, styles, and designs to create their perfect t-shirt.
(<https://nguyenpham.pro/work/t-shirt-builder>)
- **WordPress Customize Theme/Plugins**
I created many customizing a WordPress theme and plugins for a client, focusing on enhancing the user interface and experience. The goal was to create a visually appealing and user-friendly website that aligns with the client's brand identity.
(<https://nguyenpham.pro/work/wp-customize-theme>)
- **nPlatform**
I'm an author of nPlatform (<https://github.com/baonguanyam/nPlatform>) with strong expertise in modern JavaScript frameworks (React, Angular, [Next.js](#)).
- **Magazine**
I designed an online editorial system to collect articles from authors. I also had to design a post management system to manage posts from submission to publication as well as how to pay royalties to authors.
(<https://nguyenpham.pro/work/dangnho-com-magazine>)
